-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 05 October 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### DETAILED ACTION

1. In view of the amendment of October 5, 2005, previous 103(a) rejection on claims 1-10, 12-14 and 25-28 over Goodin et al'691 in view of Inoue et al'433 is hereby withdrawn.
2. Due to new grounds of rejections, the following rejections are made non-final.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 2, 3, 13, 16-22, 27 and 28 are rejected under 35 U.S.C. 102(e) as being anticipated by Goto et al (US 6,777,156 B1).

In Example 4, (see also col.5, lines 14-28, col.8, lines 64-67, col.9, lines 1-40), Goto teaches a planographic printing plate precursor having a heat sensitive layer on a substrate, in which the heat sensitive layer contains an infrared light absorbing dye, iron (III) acetylacetonate (present thermally active crosslinking metal salt) and epoxy methacrylate containing hydroxyl groups. Goto also teaches the equivalence of the epoxy methacrylate containing hydroxyl groups and a OH-group containing polymer (as his active hydrogen group-containing compounds (see col.9, lines 37-40; see also Table 3 in which OH group-containing polymer is being used as the active hydrogen group-

containing compound). Therefore, one skilled in the art would immediately envisage using an OH-group containing polymer in Goto's Example 4 as the active hydrogen group-containing compound. Goto subjects his printing precursor to laser light and then develops the exposed precursor (see col.15, lines 1-20, col.16, lines 7-20; Goto teaches that the developing can be done by using an automatic developing machine or by spraying the plate with warm water or steam). Therefore, Goto teaches present inventions of claims 16, 2, 3, 13, 17-22, 27 and 28.

***Allowable Subject Matter***

5. Claims 11, 4-8, 10, 12, 14, 23, 25 and 26 are allowed. Goto does not teach or suggest present overcoat layer comprising chitosan and an infrared-absorbing dye of claims 11 and 25. Goto does not teach or suggest present metal salt comprising silver 2-mercapto-5-amino-1,2,4-thiadiazole of claim 23.
